PERSONAL PROJECTS

Melagrana online store (11/2023 - 12/2023)

- I dedicated over one and a half months to the development of this project, which resulted in the creation of a fully functional online store. This platform allows users to make purchases using the Payme payment system. The technologies employed in this project include Next.js, Tailwind CSS, Redux Toolkit, Framer Motion, and TypeScript.
- <https://melagrana.uz/>

To do app (12/2023 - 01/2024)

- The project is built using Vue.js, a progressive JavaScript framework, emphasizing my expertise in creating dynamic and responsive user interfaces.
- Extensive integration with the Firebase API and database infrastructure to efficiently manage and store tasks. This demonstrates my capability to work with real-time databases and cloud services.
- Implemented a robust authentication system, ensuring secure user access and personalized task management. Users can securely log in, safeguarding their task-related data.
